0.4	Low	6. ACCIDEN									
6.1	Spills:	Spilled product may produce a slip hazard. Before cleaning any spill, individuals involved in spill cleanup must wear appropriate Personal Protective Equipment including gloves, glasses and NIOSH approved (or equivalent) dust respirator. Carefully vacuum or sweep up the spilled powder, particulate or slag. Dispose of properly in accordance with local, state, provincial and federal regulations. Wash all affected areas. Remove any contaminated clothing and wash thoroughly before reuse.									
		7. HANDLING	& STO	DRAG	E INFO	ORMA	TION				
7.1	Work & Hygiene Practices:	Avoid contact to eyes, skin, and thoroughly after handling and use area. Do not store or bring tobac the standards of good industrial h	d mucous . Do not s co produ	s membe smoke, e cts, gum	ranes. Avo at, drink, c	oid inhala hew gum	ation of v	o, or app	ly cosme	etics wit	hin the working
7.2	Storage & Handling:	No unusual methods are required. Keep product contained and retain all warning and identity labels. Preferred storage is a sheltered warm area with temperature and humidity control to prevent high humidity and "going through the dew point." Static charge may occur during powder transfer. Keep away from incompatible materials listed in Section 10. Open containers slowly on a stable surface. Keep container tightly closed when not in use.									
7.3	Special Precautions:	Read and understand the manufacturer's instructions and the precautionary label on this product. See American National Standard Z-49.1, "Safety in Welding, Cutting and Allied Processes," published by the American Welding Society, P. O. Box 351040, Miami, FL 33135 and OSHA Publication 2206 (29 C.F.R. 1910), U.S. Government Printing Office, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 for additional details regarding fire and explosion control, exposure control and other special precautions.

8.2	Ventilation & Engineering Controls:	Use industrial hygiene monitoring adequate ventilation (e.g., open equipment is available (e.g., sink large quantities of product and prod	doors an , safety s	d windo	ws, local e eye-wash s	exhaust v station).	ventilation Use in a	). Ensur chemical	e approp fume ho	oriate d	econtamination
8.3	Respiratory Protection:	large quantities of product and provide adequate ventilation (e.g., local exhaust ventilation, fans).  CAUTION: Welding or cutting may produce fumes and gases hazardous to health. Avoid breathing these fumes and gases. Use adequate ventilation. Use NIOSH approved respiratory protection. See ANSI Z49.1-1967 Safety in Welding and Cutting published by the American Welding Society. Keep the exposure within legal limits. In the worker's breathing zone and the general area, the fumes and gases must be kept below the TLVs and the equivalent exposure must compute to less than one. Keep exposure as low as possible. Use respirable fume respirator or air supplied respirator when welding in confined space or where local exhaust or ventilation does not keep exposure below the TLV. Where respiratory protection is necessary, NIOSH approved respiratory protection should be used. The selection of the appropriate respiratory protection (dust respirator, etc.) should be based on the actual or potential airborne contaminants and their concentrations present.									
8.4	Eye Protection:	exposure as low as possible. 	0 1	EVECUEE CONTROL O O REPOONAL PROTECTION(1-1
		EXPOSURE CONTROLS & PERSONAL PROTECTION – cont'd
8.5	Hand Protection:	Wear head, hand and body protection that help to prevent injury from hot metal, sparks, slag, infrared radiation, UV radiation, abrasions, contusions and heat stress. Protective clothing will not generally prevent shock except for leather if kept dry. Gloves made of leather with inside seams (or those that give equal performance) are preferred.
8.6	Body Protection:	Wear head, hand and body protection that help to prevent injury from radiation, sparks and electrical shock. Wear flame resistant ear plugs to keep sparks out of ears. See ANSI Z-49.1. The clothing may include heat/fire resistant gloves, overalls, aprons, sleeves, footwear, welder's spats and head cover. Wear garments made of leather, heavyweight tightly woven wool or cotton. Keep clothing clean (free of oil, grease or solvents) and in good repair. Do not wear clothing with frayed edges, tears or holes. Do not roll up sleeves or trousers (pants should not be cuffed).

		Use or storage near incompatible substances.
10.5	Incompatible Substances:	Strong oxidizing agents, strong acids and bases.
		11. TOXICOLOGICAL INFORMATION
11.1	Routes of Entry:	Inhalation: YES   Absorption: YES   Ingestion: NO
11.2	Toxicity Data:	Manganese & Manganese Oxides: High short-term (acute) exposure to manganese and its compounds may cause "metal fume fever," a condition characterized by sever flu-like symptoms of chills, fever, upset stomach, vomiting, irritation of the throat and aching of the body. Symptoms generally disappear within 48 hours after discontinuation of exposure (for example over a weekend), may quickly reappear upon resumption of exposure ("Monday morning syndrome"), and may dissipate during the workweek as the body adjusts to exposure. Chronic overexposure to Manganese compounds may result in central nervous system (CNS) effects, with symptoms that may include behavioral changes, impairment of muscle function, and sexual dysfunction. In severe cases, irreversible CNS effects may result, with a host of symptoms that mimic Parkinson's disease or muscular dystrophy.  Molybdenum: Overexposure to oxides of molybdenum may affect the body if they are inhaled, ingested or if they contact the eyes. Effects could include irritation of the eyes, nose, and throat, weight loss, and digestive disturbances. Long term effects are not known, but may be associated with muscle and joint aches, headache.  Silicon & Silicon Oxides: (Amorphous Silica) Short term overexposure may be a possible eye irritant. Repeated inhalation of amorphous silica can cause pneumoconiosis or non-disabling fibrosis of the lung.  Titanium Oxides: Oxides of titanium are considered to have minimal toxicity, as a nuisance dust. Exposure may cause mild irritation of the respiratory system and eyes. Titanium Dioxide: LC50 (rat, inh-4h) > 6.82 mg/L  Additional Information: See Section 2, "Hazard Identification," for general overview of hazards associated with use of this product, and for health hazards and symptoms associated with acute and chronic exposures to welding fumes generated from this product. See Section 3 of this SDS for specific constituents of this product in order to determine applicability of information provided in this section.
11.3	Acute Toxicity:	See Section 4.4
11.4	Chronic Toxicity:	See Section 4.5

		11. TOXICOLOGICAL INFORMATION – cont'd						
11.5	Suspected Carcinogen:	Nickel is listed as IARC Group 2B (Possibly carcinogenic to humans); NTP15 Group 1 (Known human carcinogen); CA65 (cancer). Titanium Dioxide is listed as IARC Group 2B (Possibly carcinogenic to humans). Chromium in the form of "hexavalent chromium," is considered a human carcinogen, and thus a mutagen as well. While this product does not contain hexavalent chromium, it is well known that the chromium in this product is converted to various chemical form: during the welding process, including hexavalent chromium. Therefore, use of this product in normal welding operations must be considered to represent a cancer hazard. Other constituents of this product are not considered carcinogens of mutagens. Quartz (as Silicon Dioxide) is listed as IARC Group 1 (Carcinogenic to humans).  WARNING! This product can expose you to chemicals including Hexavalent Chromium, and Nickel, which are known to the State of California to cause cancer or reproductive harm. For more information, go to www.P65Warnings.ca.gov.						
11.6	Reproductive Toxicity:	Manganese compounds may be associated with reproductive system effects.						
	Mutagenicity:	Chromium in the form of "hexavalent chromium," is believed to produce mutagenic effects in humans.						
	Embryotoxicity:	This product is not reported to produce embryotoxic effects in humans.						
	Teratogenicity:	This product is not reported to produce teratogenic effects in humans.						
	Reproductive Toxicity:	Manganese compounds may be associated with reproductive system effects.						
11.7	Irritancy of Product:	See Section 4.2						
11.8	Biological Exposure Indices:	Consult Occupational Physician for the availability and appropriateness of biological exposure indices (e.g., blood tests, urine tests, etc.).						
11.9	Physician Recommendations:	Treat symptomatically.						
		12. ECOLOGICAL INFORMATION						
12.1	Environmental Stability:	There are no specific data available for this product.						
12.2	Effects on Plants & Animals:	There are no specific data available for this product.						
12.3	Effects on Aquatic Life:	There are no specific data available for this product.						
		13. DISPOSAL CONSIDERATIONS						
13.1	Waste Disposal:	Dispose of in accordance with federal, state, provincial or local regulations.						
13.2	Special Considerations:	NA						
		14. TRANSPORTATION INFORMATION						
The	basic description (ID Num	ber, proper shipping name, hazard class & division, packing group) is shown for each mode of transportation. Additional required by 49 CFR, IATA/ICAO, IMDG and the CTDGR.

15.7	State Regulatory Information:	Titanium Dioxide is found on the following state criteria lists: MA, NJ, and PA.
		Limestone is found on the following state criteria lists: MA, MN, PA and WA.
		Silicon is found on the following state criteria lists: MA, MN, PA, and WA.
		Manganese is found on the following state criteria lists: FL, MA, MN, NJ, PA, and WA.
		Niobium is found on the following state criteria lists: MA, MN, PA, and WA.
		Vanadium is found on the following state criteria lists: FL, MA, NJ, PA and WA.
		Quartz is found on the following state criteria lists: FL, MA, MN, NJ, PA and WA.
		No other ingredients in this product, present in a concentration of 1.0% or greater, are listed on any of the following state citeria lists: i.e., with, wit
		state criteria lists: California Proposition 65 (CA65), Delaware Air Quality Management List (DE), Florida Tox
		Substances List (FL), Massachusetts Hazardous Substances List (MA), Michigan Critical Substances List (MA)
		Minnesota Hazardous Substances List (MN), New Jersey Right-to-Know List (NJ), New York Hazardous Substance
		List (NY), Pennsylvania Right-to-Know List (PA), Washington Permissible Exposures List (WA), Wisconsin Hazardo
		Substances List (WI).
15.8	Other Requirements:	<b>WARNING!</b> This product can expose you to chemicals including Hexavalent Chromium, and Nickel, which a
		known to the State of California to cause cancer or reproductive harm. For more information, go
		www.P65Warnings.ca.gov.
	1	16. OTHER INFORMATION
16.1	Other Information:	DANGER! MAY CAUSE CANCER. MAY CAUSE DAMAGE TO ORGANS (LUNGS) THROUGH PROLONGED C
		REPEATED EXPOSURE. CAUSES SERIOUS EYE IRRITATION. MAY CAUSE RESPIRATORY IRRITATION
		Obtain, read and follow instructions before use. Do not breathe dust/fume. Wash hands and exposed skin areas with a standard design and the standard standard the standard sta
		soap and warm water thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoo or in a well-ventilated area. Wear protective gloves/protective clothing/eye protection/face protection. IF INHALEI
		Remove person to fresh air and keep comfortable for breathing. IF IN EYES: Rinse cautiously with water for sever
		minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If exposed or concerned, get medic
		advice. Get medical help if you feel unwell. If eye irritation persists: Get medical help. Store locked up.
		NOTE: Local ventilation should be used during handling and use. Good housekeeping and personal hygiene ar
		recommended. Some individuals may show sensitivity to exposure. Failure to observe proper practices may be
		hazardous to health. Use only in well-ventilated areas. Harmful by inhalation. Avoid contact with skin and eyes. Do n
		breathe gas, fumes, vapor or spray. Wear suitable protective clothing, gloves and eye/face protection. In case
		insufficient ventilation wear suitable respiratory protective equipment. Avoid overexposure to metal fumes, powders ar
		particulates.
		WARNING: Electric shock from welding equipment or electrodes may be fatal. The welding process uses electric
		circuits that sustain a welding arc between the electrode and the base plate. The welding arc converts the electric
		energy into a localized, concentrated heat source. The tremendously high temperatures of the arc cause the weldir
		continuous wire and rod electrode (or filler metal, when used as such) to decompose. Electric arc working may creat one or more health hazards. Hot metal spatter and heat from electric arcs, welding flames or the thermal spray process
		may cause burns to the hands and body or may cause fire if it comes into contact with combustible materials. UV, I
		and light radiation from an electric arc may cause damage to unprotected eyes. Wear suitable protective equipmer
		Fumes and gases generated during the welding process can be harmful to your health and noise generated during
		welding can damage hearing. See also American National Standard Z-49.1, "Safety in Welding, Cutting and Allie
		Processes" published by the American Welding Society for additional safety precautions and hazard warnings.
		KEEP OUT OF REACH OF CHILDREN
		<b>WARNING!</b> This product can expose you to chemicals including <u>Hexavalent Chromium</u> , and <u>Nickel</u> , which a
		known to the State of California to cause cancer or reproductive harm. For more information, go
		www.P65Warnings.ca.gov.

### **DEFINITION OF TERMS**

A large number of abbreviations and acronyms appear on a SDS. Some of these that are commonly used include the following:

#### **GENERAL INFORMATION:**

CAS No.	Chemical Abstract Service Number
RTECS No.	Registry of Toxic Effects of Chemical Substances Number
EINECS No.	European Inventory of Existing Commercial Chemical Substances Number

#### **EXPOSURE LIMITS IN AIR:**

ACGIH American Conference on Governmental Industrial Hygienists					
IDLH	Immediately Dangerous to Life and Health				
NOHSC National Occupational Health and Safety Commission (Australia)					
OSHA U.S. Occupational Safety and Health Administration					
PEL	Permissible Exposure Limit				
STEL	Short Term Exposure Limit				
TLV	Threshold Limit Value				
TWA	Time Weighted Average				

#### FIRST AID MEASURES:

CPR	Cardiopulmonary resuscitation - method in which a person whose heart has
	stopped receives manual chest compressions and breathing to circulate blood
	and provide oxygen to the body.

#### HAZARDOUS MATERIALS IDENTIFICATION SYSTEM: HMIS

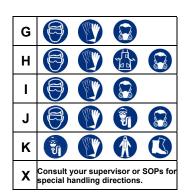

#### **HEALTH, FLAMMABILITY & REACTIVITY RATINGS:**

0	Minimal Hazard			
1	Slight Hazard			
2	Moderate Hazard			
3	Severe Hazard			
4	Extreme Hazard			

#### PERSONAL PROTECTION RATINGS:

Α			
В			
С	<b>ELL</b>	THE STATE OF THE S	
D		H.	
Е			
F	(A)	THE NAME OF THE PERSON OF THE	

#### OTHER STANDARD ABBREVIATIONS:

Carc	Carcinogenic
Irrit	Irritant
NA	Not Available
NR	No Results
ND	Not Determined
NE	Not Established
NF	Not Found
SCBA	Self-Contained Breathing Apparatus
Sens	Sensitization
STOT RE	Specific Target Organ Toxicity – Repeat Exposure
STOT SE	Specific Target Organ Toxicity – Single Exposure

#### NATIONAL FIRE PROTECTION ASSOCIATION: NFPA

FLAMMABILITY LIMITS IN AIR:					
Autoignition Temperature	Minimum temperature required to initiate combustion in air with no other source of ignition				
LEL	Lower Explosive Limit - lowest percent of vapor in air, by volume, that will explode or ignite in the presence of an ignition source				
UEL	Upper Explosive Limit - highest percent of vapor in air, by volume, that will explode or ignite in the presence of an ignition source				

#### **HAZARD RATINGS:**

0	Minimal Hazard	FLAMMABILITY
1	Slight Hazard	\
2	Moderate Hazard	REACTIVITY
3	Severe Hazard	
4	Extreme Hazard	
ACD	Acidic	
ALK	Alkaline	
COR	Corrosive	<b>─</b> / <b>₹ ₩ &gt;</b>
W	Use No Water	HEALTH 🔪
ох	Oxidizer	SPECIAL
TREFOIL	Radioactive	PRECAUTIONS

#### TOXICOLOGICAL INFORMATION:

LD <sub>50</sub>	Lethal Dose (solids & liquids) which kills 50% of the exposed animals		
LC <sub>50</sub>	Lethal concentration (gases) which kills 50% of the exposed animal		
ppm	Concentration expressed in parts of material per million parts		
TD <sub>lo</sub> Lowest dose to cause a symptom			
TCLo	Lowest concentration to cause a symptom		
TD <sub>Io</sub> , LD <sub>Io</sub> , & LD <sub>o</sub> or	Lowest dose (or concentration) to cause lethal or toxic effects		
TC, TCo, LCio, & LCo			
IARC	International Agency for Research on Cancer		
NTP	National Toxicology Program		
RTECS	Registry of Toxic Effects of Chemical Substances		
BCF	Bioconcentration Factor		
TLm	Median threshold limit		
log Kow or log Koc	Coefficient of Oil/Water Distribution		

### REGULATORY INFORMATION:

WHMIS	Canadian Workplace Hazardous Material Information System				
DOT	U.S. Department of Transportation
